

Catalin - Marius Badinescu

Full Stack Software Engineer

badinescumariuscatalin@yahoo.com

0684435153

Tilburg, Netherlands

Profile

I'm a Full Stack Developer living in Tilburg with over 2 years of experience in building and maintaining web applications.

I love the web but even more than that, I love bringing ideas and designs to life.

I'm passionate about my work, I am transparent, easy to communicate with, have a keen eye on UI/UX, I am easy to talk to, and always seeking to create bridges between technical and non-technical people.

Education

ICT & Software Engineering, Fontys University of Applied Sciences, Eindhoven (Netherlands)

08/2017–06/2021

Key Experiences

Full Stack Developer at Bizcuit, Utrecht

03/2022–Present

- Worked on the legacy system as a full stack developer where I had to maintain and release new features for the existing product working with Node.JS, React.JS, PostgreSQL
- Worked on the new system releasing features working with GraphQL (Apollo), SST Framework, Node.JS, Typescript, React.JS and DynamoDB
- Doing various tasks related to cloud services like using AWS Cloudwatch for debugging, and creating alarms and dashboards
- Always in contact with all the major banks in the Netherlands in order to solve issues with our product but also provide support for their own issues that we encountered

Full Stack Developer at Accenture, Heerlen

10/2021–02/2022

- Worked on a dashboard in React.JS for one of the biggest banks in Germany (Deutsche Bank)
- Assisted the back-end team in creating APIs that would fit UI/UX needs
- Assisted DevOps team in creating a pipeline that would fit both Accenture and the client environment

02/2016–04/2016

AWS Technical Essentials

04/2023–04/2023

Skills

Node.JS / Deno	4/5
React.JS / Next.JS	4/5
Vue.JS / Nuxt.JS	4/5
JavaScript	4/5
PostgreSQL / MySQL	4/5
C# / .NET	3/5
AWS	3/5
Python	2/5
DynamoDB	2/5
MongoDB	2/5
Microsoft Azure	2/5

Languages

English	Highly proficient
Romanian	Native speaker

Full Stack Developer at Wolfpack, Eindhoven

07/2021–09/2021

- Maintaining and adding features to my project during my graduation internship project.
- Released a custom PDF reports exporter
- Released an MVP of an education platform
- Helped maintain multiple projects in the company

Graduation Internship at Wolfpack, Eindhoven (Netherlands)

01/2021–06/2021

- Created a small Nest.JS back-end application used to upload content for ads campaigns to Azure Blob Storage and to Salesforce using SOQL queries
- A Nuxt.JS front-end application that would allow the client to see orders and upload ads for certain media campaigns
- Deployment initially on Heroku for proof on concept and then to production using Azure DevOps
- Created Apex triggers and functions in Salesforce that will allow to communicate with the Nest.JS back-end application

Front-end Web Developer at Wolfpack, Eindhoven (Netherlands)

09/2020–01/2021

Created a dashboard (using Nuxt.JS / Vue.JS) where multiple nursing homes in the Netherlands could be managed by their employees.

Internships

Front-end web developer at Accenture, Utrecht

09/2019–08/2020

I had a 6 month school internship + 6 month extension working for a client (Shell)

- Created a web application for internal use in React.JS
- Researched and deployed a BI tool instance that could be connected to a custom external system to create various dashboards
- Create a back-end application in Node.JS that could get daily data from different systems (like SonarQube, Jira etc.) in order to use it to create various dashboards
